## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Favaretto. Favaretto shows a posture chair comprising: a frame having a seat portion, a back portion and a plurality of legs (5); a seat (3) operably attached to the seat portion; and a back (4) operably attached to the back portion (10), wherein the back is oriented with respect to the seat at an angle of between ninety and one hundred twenty degrees, and wherein the back has a deflection region proximate a lower edge thereof (see Fig. 1). The back has an edge that extends around at least a portion of an outer side surface and a back surface of the back portion (see Fig4). 3. Regarding claim 10, the back further includes at least one spacer (13) that maintains the back a selected distance from the back portion.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3636

4. Claims 6-9, 12-15, 21-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Favaretto in view of Kellogg. Favaretto shows all of the teachings of the claimed invention except the use of a seat having thigh supports. Kellogg shows the conventional use of a seat having a thigh supports (see Fig. 2). Kellogg provides for a pelvis support "about" six degrees from the horizontal, (as shown in Fig 1). The method steps as recited would have been incorporated within the use of the invention, as taught by Favaretto in view of Kellogg. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the seat of Favaretto with the thigh supports and teachings of Kellogg in order to prevent abnormal strain upon the ligaments and the spine.

5. Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Favaretto. Favaretto shows all of the teachings of the claimed invention except the method steps. The method steps as recited would have been incorporated within the use of the invention as taught by Favaretto.
